Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. The claims 1 and 2 appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors, particularly these claim 1 and 2 limitations:

“total (n x m) pieces of m-to-1 selectors to which one frame where n (n: positive integer) pieces of unit data are serially arrayed is input by m (m: positive integer) pieces in parallel, from which predetermined one frame specified in an address is output and which are divided into m pieces of groups each of which includes n pieces” which are unclear.

For example, limitation “which are divided into m pieces of groups each of which includes n pieces” is unclear, because it is not understood what is divided into groups: selectors or units of data, and what are “pieces” included in the groups.

Examiner believes that any comparison of the current claims to prior art is impossible, as claims 1 and 2 cannot be understood as written.
